Environmental Compliance - Solid Waste Section  
1646 Mail Service Center  
Raleigh, North Carolina 27699-1646

Re: Assessment of Corrective Measures Extension  
Macon County Lined Landfill, Permit #57-03

Dear Mr. Lane:

This letter serves as a follow-up to our conversation on September 5, 2008 and is a formal request for an extension from the Section for the assessment of corrective measures (ACM) report due September 13, 2008. As I noted on the phone, we are in the process of completing the ACM report, but we were delayed in surveying the landfill; a crucial part of the report. The surveying has been completed and the data points are being compiled to illustrate the current topography of Cell I of the landfill. My landfill consultant firm (McGill Associates) has indicated that the topography map will be completed within the week. The environmental firm that is constructing the ACM report (Bunnell-Lammons Engineering) has indicated that they will need 40 days to complete the report once the topography data is received.

Therefore, I am requesting an extension of the due date for the ACM report of 48 days beyond the September 13, 2008 deadline. This extension, if granted, would make the report due to your office on October 31, 2008. Of course, if the report were to be completed earlier, it would immediately be forwarded the Section for your review.

I assure you that Macon County and our consultants have been and will continue to work diligently to complete this report and abide by the regulations set forth in 15A NCAC 13B .1635. Scheduling and coordination of multiple supporting consultants has simply taken more time than I anticipated. I appreciate your consideration of this request and look forward to hearing from you in this matter. If you have any questions or require additional information at this time, please do not hesitate to contact me at your convenience.

Sincerely,

Michael Chris Stahl
